Canceling OPOS Barcode Mode

Introduction

The Test button [TEST] has a double function.

- Execute a test when in a sub menu, e.g. to test the knife pressure selected, or to determine the optimal knife offset.

- Start the automated barcode cutting sequence when the machine is online (not in a sub menu). Doing so will automatically set the OPOS Alignment Mode to OPOS BARCODE.

Clicking the Test button [TEST] may unexpectedly set the machine in the barcode reading sequence.

To set the machine back in normal cutting mode, follow the procedure described below.

Procedure

Follow below procedure:

1. Press [MENU] .
   'KNIFE PRESSURE' will appear on the LCD.

2. Press [∧] .
   'SYSTEM SETUP' will appear on the LCD.

3. Press [ENTER] .
   'ACTIONS' will appear on the LCD.

4. Use [∧] or [∨] to scroll through the menu until *'CONFIGURATION'* is reached.

5. Press [ENTER] .
   'IP CONFIG' or 'LANGUAGE' will appear on the LCD, depending on cutter model.

6. Press [∧] .
   'ALIGNMENT MODE' will appear on the LCD.

7. Press [ENTER] .
   *'*OPOS BARCODE' will appear on the LCD.*

8. Press ◇ or ◇ to change this value until 'OPOS X' or 'OPOS XY' is displayed.

9. Press ◇.
    *'*OPOS X' or '*OPOS XY' will appear on the LCD.*

10. Press ◇ to exit twice to return to normal operations.
